John,

Well we did it, our new windows are in, and we could not be happier! Your staff was outstanding in helping us fill out the original order, the openings were measured perfectly and the windows installed were just as your team explained they would be! The install went perfectly, it only took a day, and there was absolutely no trash left around the house. They even finished off the drywall on the custom installed window in our bedroom!!!

Today the temperature was 103 and boy did we noticed a huge difference in the inside temp of the house, all due the energy efficiency of the windows!

I must say, being in the development business for 30 years, these windows, the locks, the screens, the installation were all superior to what I had imaged.

John, again thank you for all your help, and the beautiful windows, we will always be thanking Sierra Window Concepts for the great improvements these windows have made to our house.

Sincerely,

A handwritten signature in black ink that reads "Gary Crouch". The signature is written in a cursive, flowing style.

Gary Crouch
